Permission is usually given upon written application to the Institute to copy illustrations and short extracts from the text of individual contributions, provided that the source (and, where appropriate, the copyright) is acknowledged.

Published by Institute of Physics, 47 Belgrave Square, London SW1X 8QX in association with the American Institute of Physics.

Printed in Great Britain, Page Bros, Norwich. Set in 10/12 pt Times New Roman.

Journal of Physics C: Solid State Physics

Honorary Editor

A B Lidiard MSc PhD DSc FInstP (January to October)

R J Elliott MA DPhil (November to December)

Editorial Board

I G Austin MA ScD

Professor F Bassani FInstP

J R A Beale MA FInstP CEng MIEE

Professor H Bilz PhD

Professor P N Butcher PhD

Professor R A Cowley MA PhD FRSE

R J Elliott MA DPhil (*Deputy Chairman January to October*)

Professor C H L Goodman MA FInstP

W Hayes MA DPhil FInstP

B A Joyce DSc FInstP

T P McLean PhD FInstP

Professor G S Rushbrooke DPhil

International Advisory Board

Professor L Genzel PhD

Professor Yu Kagan PhD

Professor T Matsubara

Professor Sir Nevill Mott FRS DSc MA FInstP

Professor W Paul MA PhD AM

Professor F Seitz PhD DSc LLD FAMPhysSoc

Professor R Simmons MA PhD FAMPhysSoc

Managing Editor

D G Fisher PhD FInstP

Assistant Editor

R J Palmer DPhil

Contents

NO 1 17 JANUARY 1973

LETTERS TO THE EDITOR

The branching model for percolation theory and electrical conductivity	<i>R B Stinchcombe</i>	L1
Interpreting electron micrographs of amorphous solids	<i>M V Berry and P A Doyle</i>	L6
Comment on 'Effective van der Waals interaction between rare gas atoms in a dense classical fluid'	<i>M J Renne and B R A Nijboer</i>	L10
Shell model of lattice dynamics for monatomic system with isotropic shell-core coupling	<i>A Czachor</i>	L13
Quantum size effect with realistic surface potential	<i>A A Cottey</i>	L16
On the theory of amorphous ferromagnets	<i>T Kaneyoshi</i>	L19
Nuclear quadrupolar relaxation in liquid Ga-In alloys	<i>G Cartledge, R L Havill and J M Titman</i>	L23
Proposed experiments complementary to those of Schwartz and Hora	<i>J A Elliott</i>	L26
The investigation of the middle infrared absorption spectrum of DyVO_4 at low temperatures	<i>R J Commander and C B P Finn</i>	L29
The structure of the upper valence bands in MoTe_2 and NbSe_2	<i>R H Williams</i>	L32
He II photoemission studies of transition metal dichalcogenides	<i>P M Williams and F R Shepherd</i>	L36

PAPERS

Stabilization and chemical bonding in Zintl phases	<i>M B McNeil, W B Pearson, L H Bennett and R E Watson</i>	1
Radiolysis of strontium fluoride	<i>W Hayes and R F Lambourn</i>	11
Colour centres in strontium fluoride	<i>W Hayes, R F Lambourn, G Rangarajan and I M Ritchie</i>	27
Dislocation studies in bismuth-antimony alloy single crystals by etch pit technique	<i>V P Bhatt and G R Pandya</i>	36
The droplet model and metastable states	<i>C Domb</i>	39
The anisotropy of carrier lifetime in graphite	<i>A S Bender and D A Young</i>	43
Degree of localization in the three dimensional disordered system: II	<i>Takehiko Fujita and Jun-ichi Hori</i>	51
Thermoelectric power of silver chloride	<i>J Corish and P W M Jacobs</i>	57
Iterative method for calculating hot carrier distributions in semiconductors	<i>Claes Hammar</i>	70
Dynamic properties of Heisenberg paramagnets	<i>S W Lovesey and R A Meserve</i>	79
The direct exchange between two Tg Jahn-Teller ions	<i>M C F Passeggi and K W H Stevens</i>	98
A theory of the 'phonon bottleneck' in the Orbach process of spin-lattice relaxation	<i>J C Gill</i>	109
Paraelectric, piezoelectric and pyroelectric crystals: I. Dielectric properties	<i>G J Coombs and R A Cowley</i>	121
Paraelectric, piezoelectric and pyroelectric crystals: II. Phase transitions	<i>R A Cowley and G J Coombs</i>	143
Normal modes of excitation for a finite anisotropic crystalline array of polarizable dipoles	<i>L A Dissado</i>	158
On the theory of the far infrared absorption by alkali halide crystals	<i>A D Bruce</i>	174
Vibration spectrum of BO_3^{3-} ions in KBr crystals	<i>S C Jain, A V R Warriar and H K Sehgal</i>	189
Electronic and vibrational spectra of ferricyanide ions doped in NaCl and KCl crystals	<i>S C Jain, A V R Warriar and H K Sehgal</i>	193

NO 2 31 JANUARY 1973

LETTER TO THE EDITOR

- Comments on pseudopotential calculations of the properties of the germanium polytypes
F Aymerich and P V Smith L41

PAPERS

- A neutron diffraction determination of the crystal of α -phase potassium nitrate at 25°C and 100°C
J K Nimmo and B W Lucas 201
- Neutron scattering from supercooled gallium
D I Page, D H Saunderson and C G Windsor 212
- Dimension changes in a solid containing anisotropic defects
A M Stoneham 223
- The self trapped hole in alkaline earth fluorides: I. Static properties
M J Norgett and A M Stoneham 229
- The self trapped hole in alkaline earth fluorides: II. Hopping motion
M J Norgett and A M Stoneham 238
- The rôle of exciton diffusion in the electron induced sputtering of alkali halides
Y Al Jammal, D Pooley and P D Townsend 247
- Acoustic-wave rotation in a concentrated paramagnetic crystal: spin $\frac{1}{2}$ system
J W Tucker 255
- Computer simulation of semiconductor devices
H D Rees 262
- Electrical properties of InAs to very high pressures
G D Pitt and M K R Vyas 274
- Low temperature Hall measurements on the X_{1c} electrons in GaAs
M K R Vyas, G D Pitt and R A Hoult 285
- Model calculation on exchange core polarization in transferred hyperfine interaction
O F Schirmer 300
- Near-infrared absorption of Ni^{2+} in ZnO and ZnS: Dynamic Jahn-Teller effect in the 3T_2 state
U Kaufmann, P Koidl and O F Schirmer 310
- Two-magnon correlations in Heisenberg antiferromagnets: an equation of motion study
C R Natoli and J Ranninger 323
- Two-magnon light scattering in rutile structure Heisenberg antiferromagnets
C R Natoli and J Ranninger 345
- Two-magnon neutron scattering in CoF_2
C R Natoli and J Ranninger 370
- Dynamical properties of Heisenberg antiferromagnets: comparison of equation of motion and diagrammatic techniques
C R Natoli and J Ranninger 386

NO 3 14 FEBRUARY 1973

LETTERS TO THE EDITOR

- Comment on 'Singular matrix representations of point groups'
R Subramanian L47
- Localization distance and mean free path in one-dimensional disordered systems
D J Thouless L49
- Damping theory of the magnetophonon structure in the longitudinal Seebeck effect in semiconductors
J R Barker L52
- On the possibility of detecting slow molecular reorientation in polymers by photon correlation spectroscopy
D A Jackson, E R Pike, J G Powles and J M Vaughan L55

PAPERS

- The interaction of adsorbed molecules
P Richmond and K W Sarkies 401
- Statistical mechanical calculation of the surface properties of a strongly interacting boson fluid
Clive A Croxton 411
- Temperature and pressure dependence of the T_{1c} electron mobility in GaSb
J Basinski, S D Rosenbaum, S L H Basinski and J C Woolley 422
- The predominant rôle of the surface films in the emission of electrons from reverse-biased p-n junctions in silicon carbide
A E Widdowson and F W G Rose 437

The significance of substrate parameters in the theory of negative differential resistance	<i>T M Hayes and David D Thornburg</i>	450
Band structure and the crystal field	<i>D J Newman</i>	458
Electric field gradient calculations in dicalcium ferrite	<i>E C Reynhardt</i>	467
Non-additive phonon-induced broadening in Nd ³⁺ YAG	<i>G E Stedman and N A Cade</i>	474
Theory of antiferromagnetism and light absorption in solid oxygen	<i>Rajendra Bhandari and L M Falicov</i>	479
Spin correlations in RbMnF ₃ at 1.17 T _N	<i>M T Evans and C G Windsor</i>	495
Theory of highly anisotropic ferromagnets: I. Magnetic anisotropy and magnetostriction	<i>M S S Brooks and T Egami</i>	513
A nuclear magnetic resonance study of the transferred hyperfine interaction in K ₂ IrCl ₆ and K ₂ ReCl ₆	<i>Alan G Brown, Robin L Armstrong and Kenneth R Jeffrey</i>	532
Direction pattern of phase-matched second harmonic generation in biaxial sodium nitrite	<i>B Hofmann and H Vogt</i>	543
Optical anisotropy in layer compounds	<i>W Y Liang</i>	551
Raman scattering and the ferroelectric phase transition in 5PbO.3GeO ₂	<i>J F Ryan and K Hisano</i>	566
The Raman spectrum of copper formate tetrahydrate	<i>R P Canterford and F Ninio</i>	575
Multiphonon infrared absorption spectra of MgO and CaO	<i>J T Gourley and W A Runciman</i>	583
Two-photon absorption in indium antimonide at 10.6 μ m	<i>J M Doviak, A F Gibson, M F Kimmitt and A C Walker</i>	593

NO 4 28 FEBRUARY 1973

LETTERS TO THE EDITOR

Electronic correlation functions at long wavelength in liquid metal alloys	<i>N H March, M P Tosi and A B Bhatia</i>	L59
Defect clusters in doped fluorite crystals	<i>C R A Catlow</i>	L64
Critical U/W in the Hubbard model	<i>B Johansson</i>	L71
A note on band gaps in amorphous semiconductors	<i>M F Thorpe</i>	L75
Antiferroelectricity among compounds with spinel structure?	<i>N W Grimes</i>	L78
Comment on recent misinterpretations of the Mössbauer and ESR spectra of low-spin Fe III complexes	<i>G Lang and B W Dale</i>	L80

PAPERS

LEED intensity measurements and surface structures: The dynamical approach	<i>S Andersson and J B Pendry</i>	601
Concentration fluctuations in conformational solutions and partial structure factors in alloys	<i>A B Bhatia, W H Hargrove and N H March</i>	621
Structural, electronic and optical properties of some polymorphs of germanium and amorphous germanium	<i>D Henderson and I B Ortenburger</i>	631
Energies of formation of point defects in γ -CuCl	<i>Jouko Laine</i>	637
Measurements of the thermal conductivity of 'pure' Al ₂ O ₃ and Al ₂ O ₃ :Mg—Possible observation of Fe ⁴⁺ in Al ₂ O ₃	<i>Michael A Brown</i>	642
Wannier-Stark ladders and the energy spectrum of an electron in a finite one dimensional crystal	<i>G C Stey and G Gusman</i>	650
Microwave absorption by bunched carriers in acoustoelectric domains	<i>K Hess and H Kuzmany</i>	657
Electron and hole effective masses in lead polonide (PbPo)	<i>Richard Dalven</i>	671
The effect of interactions on electron tunnelling via exchange scattering	<i>A F G Wyatt</i>	673
Theory of zero bias anomalies due to paramagnetic impurities	<i>H M Gupta</i>	686
Galvanomagnetic transport coefficients of thin conducting films for a general class of surface scattering laws	<i>A A Cottey</i>	699
The relativistic crystal field	<i>R Chatterjee, D J Newman and C D Taylor</i>	706

The effect of configuration interaction on the magnetic properties of Ru^{4+} in single cubic crystals	<i>H U Rahman</i>	715
Magnetic ordering of neodymium monopnictides determined by neutron diffraction	<i>P Schobinger-Papamantellos, P Fischer, O Vogt and E Kaldis</i>	725
Complex spin waves in metallic ferromagnets	<i>G Barnea and G Horwitz</i>	738
Photoinduced changes in the magnetic anisotropy of silicon-doped yttrium iron garnet	<i>R W Teale and D I Weatherley</i>	750
The Jahn-Teller effect in $\text{K}_2\text{PbCu}(\text{NO}_2)_6$	<i>B V Harrowfield and J R Pilbrow</i>	755
Dielectric properties and ferroelectric transitions of thiourea	<i>D R McKenzie and J S Dryden</i>	767
Stark effect of the F centre in CaO	<i>A Gelineau, T Buch, A Geoffroy and C Naud</i>	774
The visible luminescence of copper doped zinc telluride	<i>A T J Baker, F J Bryant and J E Lowther</i>	780
Thermoluminescence theory	<i>W E Hagston</i>	784
Tunnel luminescence	<i>W E Hagston</i>	797

NO 5 14 MARCH 1973

LETTERS TO THE EDITOR

Energy bands in LiH	<i>A B Kunz and D J Mickish</i>	L83
Delay time and conductivity expiration of a new low-conductance switching effect	<i>F Mahdjuri and A Tausend</i>	L86
Another interpretation of transition rounding and Pippard's relations	<i>F J Bartis</i>	L90
Spontaneous staggered polarization of the F model	<i>Rodney J Baxter</i>	L94
Spin waves in the one- or two-dimensional classical Heisenberg ferromagnet with a hard magnetization axis	<i>J Villain</i>	L97
The coupling of two nuclear Zeeman reservoirs by the electronic spin-spin reservoir	<i>S F J Cox, V Bouffard and M Goldman</i>	L100
Luminescence quenching and zero-phonon line broadening associated with the defect interactions in diamond	<i>Gordon Davies and Michael Crossfield</i>	L104
Spectral lineshape for the parity-forbidden transitions $^2\text{P}_{1/2} \rightarrow ^2\text{P}_{3/2}$ of Tl^0 in KCl	<i>Taiju Tsubio and P W M Jacobs</i>	L109
The variation of energy gap with composition in ZnS-Te alloys	<i>R Hill and D Richardson</i>	L115

PAPERS

Self motion in classical liquids	<i>S K Mitra</i>	801
The localized potential method and the classical lattice dynamics	<i>J Ginter</i>	808
On the quadrupole interaction in the diamond structure	<i>J Ginter</i>	819
Van Hove singularities and zero-slope points in crystals	<i>A P Cracknell</i>	826
Van Hove singularities and zero-slope points in magnetic crystals	<i>A P Cracknell</i>	841
A method for calculating the low temperature surface specific heat of a crystal lattice	<i>M G Burt</i>	855
The interaction between two hydrogen atoms adsorbed on (100) tungsten	<i>T B Grimley and M Torrini</i>	868
The electronic structure of a disordered network	<i>J Dancz, S F Edwards and N H March</i>	873
The oscillatory structure of the magnetophonon effect: II Resolvent analysis of the longitudinal configuration	<i>J R Barker</i>	880
The properties of $(3d)^4$ ions in corundum: III. The Jahn-Teller theory of the ^5E ground state and the parameters for Cr^{2+}	<i>C A Bates, P C Jaussaud and W Smith</i>	898
Low temperature critical behaviour of the Ising model with spin $S > \frac{1}{2}$	<i>P F Fox and A J Guttmann</i>	913
Stabilization of the paraelectric phase of KTaO_3 and SrTiO_3 by strong quartic anharmonicity	<i>R P Lowndes and A Rastogi</i>	932

NO 6 28 MARCH 1973

LETTERS TO THE EDITOR

Mechanical instability of a degenerate charged fermion fluid	<i>Manuel de Llano</i>	L121
A comment on the heat capacity of an anharmonic crystal at high temperatures	<i>E R Cowley</i>	L125
Molecular excitons and charge-carrier mobilities in low-mobility solids	<i>B F Rose</i>	L128
Dielectric function variations in ternary zinc compound semiconductor alloy systems	<i>D Richardson and R Hill</i>	L131
A free-fermion model, and the solution of an Ising model with pure triplet interactions	<i>D W Wood</i>	L135
^{17}O transferred hyperfine interactions in magnesium oxide	<i>P Freund, J Owen and B F Hann</i>	L139
Quantum oscillations and pump depletion effects in an efficient high-power tunable spin-flip laser	<i>R A Wood, A McNeish, C R Pidgeon and S D Smith</i>	L144
Deviations from Ohm's law in n-CdS at 77 K	<i>K Hess and H Vana</i>	L150

PAPERS

Limiting ring closure probability index for the self avoiding random walk problem	<i>A J Guttman and M F Sykes</i>	945
Possible structures for alkali ions on the surface of alkali halides	<i>Y Al Jammal and P D Townsend</i>	955
A new interpretation of the Rabin and Klick diagram	<i>P D Townsend</i>	961
Mobility of the self-trapped paramagnetic spin polaron	<i>D T Vigen</i>	967
Solution of the Boltzmann equation in ellipsoidal valleys with application to the $\langle 100 \rangle$ valleys of GaAs and GaP	<i>K Fletcher and P N Butcher</i>	976
A transport equation treatment of tunnelling in semiconductors	<i>J E Parrott</i>	997
Theory of nuclear spin interactions in ferromagnetic insulators: I. The thermodynamic properties	<i>M G Cottam and M J Jones</i>	1007
Theory of nuclear spin interactions in ferromagnetic insulators: II. The excitation spectrum	<i>M G Cottam and M J Jones</i>	1020
The tilted helix: an intermediate magnetic phase	<i>David Sherrington</i>	1037
Selection rules for inelastic neutron scattering by magnetic crystals: I. The symmetries of magnetoelastic waves and the determination of selection rules for magnon-phonon interactions, with an application to antiferromagnetic FeF_2	<i>A P Cracknell</i>	1054
Cross relaxation in γ -irradiated ruby	<i>M A Brown, L J Challis, W S Moore, T Yalcin and D L Waldorf</i>	1063
Soft modes and the structure, spontaneous polarization and Curie constants of perovskite ferroelectrics: tetragonal potassium niobate	<i>A W Hewat</i>	1074
On optical properties of crystals	<i>P Chandrasekhar and T P Srinivasan</i>	1085
Optical vibrations in sheet silicates	<i>Eugene Loh</i>	1091
Colour centre luminescence in KMgF_3 : Mn crystals	<i>W A Sibley, S I Yun and W E Vehse</i>	1105
Calculation of the Compton profiles for ionic crystals	<i>O Aikala, V Jokela and K Mansikka</i>	1116

NO 7 12 APRIL 1973

LETTERS TO THE EDITOR

Momentum transfer cross sections and the Z_1 oscillations in stopping power	<i>J S Briggs and A P Pathak</i>	L153
A surface plasmon calculation	<i>J E Inglesfield and E Wikborg</i>	L158
Critical exponents of the modified F model	<i>H J Brascamp, G Kunz and F Y Wu</i>	L164
Low-frequency Raman spectra of single-crystal textured polyethylene	<i>R T Harley, W Hayes and J F Twisleton</i>	L167

PAPERS

Properties of the magnetically quenchable positron state in alkali halides	<i>A Bisi, A Dupasquier and L Zappa</i>	1125
Radiation damage in oxides: I. Defect formation in MgO	<i>A J Tench and M J Duck</i>	1134
Calculation of hydrogen vibrations in alkaline earth fluorides	<i>W Hayes and M C K Wiltshire</i>	1149
Infrared absorption and thermal conductivity of CaF ₂ containing heavy metal impurities	<i>W Hayes, M C K Wiltshire, R Berman and P R W Hudson</i>	1157
Path integral theory of anharmonic crystals	<i>V Samathiyakanit and H R Glyde</i>	1166
Ordering, metastability and phase transitions in two-dimensional systems	<i>J M Kosterlitz and D J Thouless</i>	1181
Frequency moments and viscosities of liquid sodium	<i>Ravinder Bansal</i>	1204
Temperature and volume dependence of the thermal conductivity of solid argon	<i>F Clayton and D N Batchelder</i>	1213
The scattering of atoms from surfaces: III. A surface of spheres	<i>J L Beeby</i>	1229
Electronic states for surfaces of muffin-tin potentials	<i>J L Beeby</i>	1242
Hot electron Shubnikov-de Haas effect in n-InSb	<i>G Bauer and H Kahlert</i>	1253
Surface polaritons on semi-infinite gyromagnetic media	<i>A Hartstein, E Burstein, A A Maradudin, R Brewer and R F Wallis</i>	1266
Probabilities for radiative and nonradiative decay of Pr ³⁺ ion in LaAlO ₃	<i>C Delsart and N Pelletier-Allard</i>	1277
EPR studies of CaO doped with Mg	<i>P Weightman and T P P Hall</i>	1292
Time resolved spectroscopy involving multiply ionizable donor-acceptor states	<i>A T J Baker, F J Bryant and W E Hagston</i>	1299
Interpretation of asymmetric band shapes in terms of bound exciton complexes	<i>F J Bryant, A T J Baker and W E Hagston</i>	1316

NO 8 26 APRIL 1973

LETTER TO THE EDITOR

Second sound in a solid under shock compression	<i>D H Tsai and R A MacDonald</i>	L171
---	-----------------------------------	------

PAPERS

Shell model calculations of the energies of formation of point defects in alkaline earth fluorides	<i>C R A Catlow and M J Norgett</i>	1325
Averaged density of states in disordered systems	<i>Abhijit Mookerjee</i>	1340
Many-body effects at metal-semiconductor junctions: II. The self energy and band structure distortion	<i>J C Inkson</i>	1350
Tunnelling in metal-semiconductor contacts: I. Influence of the impurities	<i>R Combescot and G Schreder</i>	1363
Shielding of quadrupole crystalline electric field at a Pr ³⁺ ion	<i>K C Das and A K Raychaudhuri</i>	1385
Critical behaviour of anisotropic cubic systems	<i>D J Wallace</i>	1390
Magnetization density and the magnetic structure of cobalt carbonate	<i>P J Brown, P J Welford and J B Forsyth</i>	1405
Magnetic and structural properties of BiFeO ₃	<i>C Blaauw and F van der Woude</i>	1422
Electron paramagnetic resonance of rare earth ions in calcia stabilized zirconia: Gd ³⁺ and Yb ³⁺	<i>G Bacquet, J Dugas, C Escribe and F Fabre</i>	1432
Temperature variation and Zeeman effect studies of NQR of ³⁵ Cl in 4 chloro, 2 nitro phenol	<i>G Chakrapani, C V Rama Sastry and C R K Murty</i>	1444
The rôle of highly localized excitons in the photoabsorption spectra of ionic crystals	<i>Teijo Åberg and J L Dehmer</i>	1450

NO 9 10 MAY 1973

LETTERS TO THE EDITOR

- Velocity measurements of electrodynamic flow in a nematic liquid crystal
M Bertolotti, S Lagomarsino, F Scudieri and D Sette L177
- Screened exchange in semiconductors
J C Inkson L181
- Temperature dependence of the field emission current in He II
P V E McClintock L186
- Application of the Wilson theory of critical phenomena to a structural phase transition
R A Cowley and A D Bruce L191

PAPERS

- On the Green function for a particle in a uniform electric field
Curt A Moyer 1461
- Use of the drone-fermion representation II: phonon scattering by paramagnetic ions
G A Toombs and F W Sheard 1467
- An investigation of the thermal diffuse scattering of x rays by hexamine: I
W G Ferrier, J T McMullan and D C Sutherland 1489
- An investigation of the thermal diffuse scattering of x rays by hexamine: II
D C Sutherland and W G Ferrier 1500
- On the separation of internal and external vibrations in molecular crystals
L Piseri 1521
- The steam-water-ice system: a two dimensional bonded lattice model. The first-order approximation
D A Lavis 1530
- The heat capacity of tellurium between 1.5 and 20 K
A J Leadbetter and A P Jeapes 1546
- Thermal expansion of tellurium
G K White 1548
- Numerical studies of the one-dimensional random Anderson model
Elvin J Moore 1551
- The condition for the equivalence of localized state and Bloch state expansions in generalized coherent potential approximations
P L Leath 1559
- Electronic charge densities for ZnS in the wurtzite and zincblende structures
John D Joannopoulos and Marvin L Cohen 1572
- The conduction band structures of GaAs and InP
G D Pitt 1586
- Reorientation of Na⁺-anion vacancy and Y³⁺-fluorine interstitial complexes in CdF₂
A Kessler 1594
- Parametric processes in the acoustoelectric effect
B K Ridley 1605
- The magnetic form factor of Mn²⁺ in MnO by powder neutron diffraction
A J Jacobson, B C Tofield and B E F Fender 1615
- Comparative studies of magnetic circular dichroism and susceptibility in antiferromagnetic Rb₂NiF₄
J Ferré, R V Pisarev, M J Harding, J Badoz and S A Kizhaev 1623
- Electron paramagnetic resonance and optical studies of the F_A⁺ centre in magnesium-doped calcium oxide
J F Boas, T P P Hall and A E Hughes 1639
- Actinide pnictides and chalcogenides: II. Tellurium hyperfine field in uranium monotelluride from Mössbauer spectroscopy and its relation to the uranium ordered moment
G Longworth, F A Wedgwood and M Kuznietz 1652
- Mössbauer investigation of the metal-nonmetal transition in hexagonal NiS doped with 2-at % ⁵⁷Fe
J R Gosselin, M G Townsend, R J Tremblay, L G Ripley and D W Carson 1661
- A calculation of the lineshape for the singlet to doublet transition in an E ⊗ ε system
R Engman and P Steggles 1673
- Line structure in the continuous x ray spectrum: some experimental results
J A Elliott and D Easingwood-Wilson 1677
- Directional dependence of photoemission from layer crystals
H P Hughes and W Y Liang 1684
- Corrigenda 1692

NO 10 24 MAY 1973

LETTERS TO THE EDITOR

- Chemical diffusion in KCl-RbCl solid solution
Rauno Lindström L197

Electron density of states in disordered systems	<i>G Cubiotti, E Donato, E S Giuliano and R Ruggeri</i>	L202
A new formalism for the study of configuration-averaged properties of disordered systems	<i>Abhijit Mookerjee</i>	L205
Electric-field-induced thermally detected EPR of non-Kramers ions in Al_2O_3	<i>W S Moore, C A Bates and T M Al-Sharbat</i>	L209

PAPERS

Experimental and theoretical determination of the imaginary parts of the atomic scattering factors by means of the Borrmann effect in nearly perfect Si crystals	<i>A Hountas, S E Filippakis, C Papathanassopoulos and Th Tsakalakos</i>	1693
The effect of boundary scattering on the high temperature thermal conductivity of silicon	<i>N Savvides and H J Goldsmid</i>	1701
Band structure and optical properties of tetragonal BaTiO_3	<i>F M Michel-Calendini and G Mesnard</i>	1709
Energy bands in LiF and solid Ar	<i>Daniel J Mickish and A Barry Kunz</i>	1723
A selfconsistent theory of localization	<i>R Abou-Chacra, P W Anderson and D J Thouless</i>	1734
Calculations of impurity states in semiconductors: I	<i>M Jaros and S F Ross</i>	1753
Theory of exciton-polariton generation by two-photon absorption	<i>David Boggett and Rodney Loudon</i>	1763
A reappraisal of instabilities due to the transferred electron effect	<i>D Jones and H D Rees</i>	1781
Hall effect in an acoustoelectric domain in p type GaSb	<i>T P Lepetre, J M Dusseau, J L Robert and B Pistoulet</i>	1794
Coupled nuclear and electronic spin wave modes in the presence of quadrupolar interaction	<i>Raymund C Jones and D Sherrington</i>	1800
EPR and optical spectroscopy of Nd^{3+} ions in calcium aluminate	<i>A J Lindop and D W Goodwin</i>	1818
Photoluminescence in amorphous As_2S_3	<i>R A Street, T M Searle and I G Austin</i>	1830

NO 11 11 JUNE 1973

LETTERS TO THE EDITOR

On the calculation of electron diffraction intensities	<i>D K Saldin and M J Whelan</i>	L215
Effective-hamiltonian approach to Jahn-Teller coupling of impurities in crystals	<i>R Englman and B Halperin</i>	L219
Interstitial nitrogen defects in gallium phosphide	<i>S R Morrison and R C Newman</i>	L223
The dispersion of transverse zero sound in liquid helium 3	<i>M J Lea, A R Birks, P M Lee and E R Dobbs</i>	L226
Electrical resistance near the antiferromagnetic transition of dysprosium	<i>K V Rao, Ö Rapp, T G Richard and D J W Geldart</i>	L231
The rôle of contacts in frequency-dependent conduction in disordered solids	<i>A K Jonscher</i>	L235
An example of cross-spin-lattice relaxation in an electronic spin system	<i>J C Gill and P A Ivey</i>	L240
Acceptor levels in gallium arsenide	<i>A M White, P J Dean, D J Ashen, J B Mullin, M Webb, B Day and P D Greene</i>	L243

PAPERS

Inverse transport coefficients	<i>H B Ghassib, R Gilbert and G J Morgan</i>	1841
Some aspects of conduction in disordered one-dimensional structures	<i>Aaron N Bloch and C M Varma</i>	1849
Single-particle motion in classical monoatomic liquids	<i>S W Lovesey</i>	1856
The relaxation of phonons	<i>R A H Hamilton</i>	1863
Coupling of long-wavelength optical phonons in the presence of external forces	<i>E Anastassakis</i>	1870
Solvable model for three-dimensional disordered systems	<i>G Lehmann</i>	1881

Some details of the density of states of a disordered alloy	<i>J E Gubernatis and P L Taylor</i>	1889
Some comments on the construction of an orthonormal set of LCAO basis functions for crystals	<i>Tor Ahlenius, Jean-Louis Calais and Per-Olov Löwdin</i>	1896
Electron correlation at metallic densities II: Calculation of the correlation coefficient	<i>T P Fishlock and J B Pendry</i>	1909
Valence bands and Davydov splittings in solid ortho-hydrogen	<i>L A Gómez, G Pastori Parravicini, L Resca and R Resta</i>	1926
Spin waves in disordered systems: II. The dilute antiferromagnet (Mn, Zn)F ₂	<i>W J L Buyers, D E Pepper and R J Elliott</i>	1933
Tunnelling rotation rate of a weakly hindered methyl group	<i>S Clough and F Poldy</i>	1953
Angle dependence of forbidden ($\Delta m = \pm 1$) paramagnetic resonance line intensities of Mn ²⁺ in corundum	<i>P Mialhe and A Erbeia</i>	1965
Transition line strengths for excitons bound to neutral acceptors in direct gap semiconductors	<i>A M White</i>	1971
The Jahn–Teller interaction and 3d ⁹ ions at tetrahedral sites: II. Tetragonal distortions	<i>C A Bates and P E Chandler</i>	1975
The question of divacancies in germanium	<i>S R Morrison and R C Newman</i>	1981

NO 12 25 JUNE 1973

LETTER TO THE EDITOR

Effect of degeneracy in the Hubbard model	<i>M Cyrot and C Lyon-Caen</i>	L247
---	--------------------------------	------

PAPERS

Collective excitations in classical liquids	<i>K N Pathak and Ravinder Bansal</i>	1989
Tunnelling levels of a libration in O _h field	<i>S C Jain and V K Tewary</i>	1999
The elastic constants of strontium molybdate	<i>J M Farley, G A Saunders and D Y Chung</i>	2010
Isotope effect for silver diffusion in AgBr and AgCl	<i>N L Peterson, L W Barr and A D Le Claire</i>	2020
Cyclotron resonance in indium. Electron–phonon effects	<i>B Castaing and P Goy</i>	2040
Nonlocal shift of the principal surface plasmon in quantizing magnetic field	<i>N J Morgenstern Horing, Musa Yildiz, Fikret Kortel and Timsal Çağlayan</i>	2053
Phase transitions and the Jahn–Teller effects in Ti ₂ PbCu(NO ₂) ₆	<i>B V Harrowfield, A J Dempster, T E Freeman and J R Pilbrow</i>	2058
The phonon dispersion curves, infra-red and Raman spectra of SrCl ₂	<i>Pamela A Denham, P L R Morse and G R Wilkinson</i>	2066
Corrigenda		2076

NO 13 9 JULY 1973

LETTERS TO THE EDITOR

Electron localizations by density fluctuations	<i>J P Hernandez and J M Ziman</i>	L251
Electron–ion triplet correlations in liquid metals	<i>M Parrinello and M P Tosi</i>	L254
On the calculation of surface states for (111) faces of diamond lattices	<i>F Flores and J Rubio</i>	L258
Critical exponent for the surface magnetization of the three-dimensional Ising model	<i>Michael N Barber</i>	L262
The measurement of the trigonal splitting of Fe ²⁺ in Al ₂ O ₃ by a frequency crossing technique using thermal phonons	<i>B R Anderson and L J Challis</i>	L266
Gadolinium–ligand pairs in calcium fluoride	<i>D J Newman</i>	L271
Localized vibrational modes induced in CaF ₂ by rare-earth impurities	<i>W Hayes, M C K Wiltshire, W J Manthey and D S McClure</i>	L273
Corrigenda		L277

PAPERS

Critical behaviour of two Ising models with four-spin interactions	<i>J Oitmaa and R W Gibberd</i>	2077
Percolation theory and the Ising model	<i>A R Bishop</i>	2089
Factors affecting the formation of U centres by proton implantation of alkali halides	<i>A E Hughes and D Pooley</i>	2094
The elastic constants of GaAs from 2 K to 320 K	<i>R I Cottam and G A Saunders</i>	2105
Anisotropic heat conduction in HCP ^4He	<i>R Berman, C R Day, D P Goulder and J E Vos</i>	2119
Band structure of solid HF	<i>F Bassani, L Pietronero and R Resta</i>	2133
Exact solution of the AC hopping conductivity problem at low site densities	<i>P N Butcher and P L Morys</i>	2147
Low-frequency impurity hopping Hall conductivity	<i>S K Lyo</i>	2158
The intrinsic photoconductivity of liquid xenon	<i>I Roberts and E G Wilson</i>	2169
Optical absorption edges of compound semiconductors in the ZnSiP_2 - ZnSiAs_2 range	<i>W C Clark and R F Stroud</i>	2184
Many-electron theory of distorted lattices	<i>K W H Stevens</i>	2191
Crystal field and exchange parameters in KNiF_3	<i>D J Newman</i>	2203
Magnetic interactions in holmium phosphate, HoPO_4	<i>A H Cooke, S J Swithenby and M R Wells</i>	2209
Nuclear spin-lattice relaxation in solid cuprous halides	<i>E R Andrew, W S Hinshaw and R S Tiffen</i>	2217
Selective modulation of recoilless γ -rays	<i>P Hannaford and R G Horn</i>	2223
Optical Zeeman effect of type I $\text{Er}^{3+}:\text{CaF}_2$	<i>A F Leung</i>	2234
X-ray K-absorption edge of niobium in some niobium compounds	<i>V G Bhide and M K Bahl</i>	2241

NO 14 23 JULY 1973

LETTERS TO THE EDITOR

Cs and H_2 adsorption on W(100)	<i>C A Papageorgopoulos and J M Chen</i>	L279
Localization on a Bethe lattice	<i>J L Beeby</i>	L283
Comments on the relativistic crystal field	<i>J Andriessen, R Chatterjee and D van Ormondt</i>	L288
Electric quadrupole interaction in the phase transition region of antiferroelectric PbHfO_3	<i>H V Einsiedel and S S Rosenblum</i>	L292

PAPERS

Convergence of the anharmonic terms in the free energy of solid krypton	<i>V E Dan Doren and J H Henkel</i>	2249
Neutron scattering from aqueous solutions: the long-wavelength limit	<i>J L Beeby</i>	2262
Compressibility and concentration fluctuations in liquid magnesium alloys	<i>S P McAlister, E D Crozier and F F Cochran</i>	2269
The transport of heat in isotopic mixtures of solid neon: an experimental study concerning the possibility of second-sound propagation	<i>R M Kimber and S J Rogers</i>	2279
Convergence properties of APW wavefunctions and matrix elements	<i>B N Harmon, D D Koelling and A J Freeman</i>	2294
Moment approach to random systems including off-diagonal randomness and short-range order	<i>D M Esterling and D Bilodeau</i>	2300
A new approach to band gaps in ordered and disordered materials	<i>R Jones</i>	2318
Narrow-band charge transport in SnI_4	<i>T E Whall and V Juzova</i>	2329
Coherent potential approximation for insulating Heisenberg antiferromagnetic alloys	<i>J B Parkinson</i>	2337
Selection rules for inelastic neutron scattering by magnetic crystals: II. One-magnon inelastic scattering, with an application to simple ferromagnetic FCC, BCC and HCP metals	<i>A P Cracknell and A K Sedaghat</i>	2350
Tunnelling rotation of a deuterated methyl group	<i>S Clough and F Poldy</i>	2357
Temperature dependence of the EPR of Mn^{2+} in K_2SO_4	<i>T E Freeman, J F Le Marshall and J R Pilbrow</i>	2366

Mössbauer study and band structure of FeSi_2	<i>C Blaauw, F van der Woude and G A Sawatzky</i>	2371
The phase transitions of PrAlO_3	<i>R T Harley, W Hayes, A M Perry and S R P Smith</i>	2382

NO 15 6 AUGUST 1973

LETTERS TO THE EDITOR

The transitional opalescence of quartz	<i>F J Bartis</i>	L295
New method for the band structure problem with overlapping potentials	<i>Leonard Eyges</i>	L298
Comment on 'Critical exponents for the modified F model'	<i>I G Enting</i>	L302
On surface effects in reflectivity measurements of alkali halides	<i>E P Kartheuser</i>	L304

PAPERS

Exact phonon Green function for Kirkwood's model of polyethylene	<i>Christhard Schmid and Klaus Hölzl</i>	2401
Lattice dynamics of strontium titanate: anharmonic interactions and structural phase transitions	<i>A D Bruce and R A Cowley</i>	2422
On a contribution to the Hall coefficient produced by resonant impurity scattering	<i>W G Chambers</i>	2441
Quantum size effect with arbitrary surface potential	<i>A A Cottey</i>	2446
Ising model in a transverse field: I. Basic theory	<i>R B Stinchcombe</i>	2459
Ising model in a transverse field: II. Spectral functions and damping	<i>R B Stinchcombe</i>	2484
Thermal and magnetic properties of the transverse Ising model	<i>R B Stinchcombe</i>	2507
The thermal conductivity of NiO and CoO at the Néel temperature	<i>F B Lewis and N H Saunders</i>	2525

NO 16 20 AUGUST 1973

LETTERS TO THE EDITOR

LEED spectra determination of the atomic location of tellurium adsorbed on $\text{Ni}(001)$	<i>J E Demuth, D W Jepsen and P M Marcus</i>	L307
Correlation functions of impurities in solids	<i>J R Fletcher</i>	L311
Phonon frequencies in xenon by inelastic neutron scattering	<i>B J Palmer, D H Saunderson and D N Batchelder</i>	L313
Effect of perpendicular magnetic fields on the resistive transition of superconducting films	<i>Koya Aoi and M A Klenin</i>	L316
Effect of non-stoichiometry on the magnetic properties of NiS_2	<i>F Gautier, G Krill, M F Lapierre and C Robert</i>	L320
Infrared studies of the acceptor states in epitaxial films of GaAs	<i>R F Kirkman and R A Stradling</i>	L324
Ultraviolet reflectivity of NH_4I in the NaCl and CsCl structures	<i>G Stühmer and E Rieflin</i>	L329

PAPERS

Low-temperature expansions for Ising models with pair, triplet and quartet interactions present. II	<i>H P Griffiths and D W Wood</i>	2533
Analysis of the anisotropic Ising model	<i>I G Enting</i>	2555
Cubic-tetragonal-orthorhombic-rhombohedral ferroelectric transitions in perovskite potassium niobate: neutron powder profile refinement of the structures	<i>A W Hewat</i>	2559
Impact ionization thresholds in semiconductors	<i>R A Ballinger, K G Major and J R Mallinson</i>	2573
On force-force correlation functions and the resistivity	<i>W G Chambers</i>	2586
Hyperfine interactions and electron transfer between metal ions in Fe:LaAlO_3 and Cr:LaAlO_3	<i>D R Taylor, J Owen and Barbara M Wanklyn</i>	2592
Mössbauer effect study of gadolinium compounds using ^{155}Gd	<i>J D Cashion, D B Prowse and A Vas</i>	2611

NO 17 4 SEPTEMBER 1973

LETTERS TO THE EDITOR

- Off-centre displacements in spinels: a neutron diffraction examination of MgCr_2O_4
C Infante and B E F Fender L333
- ENDOR investigation of the F^+ centre in Mg^{17}O
A L Allsop, J Owen and A E Hughes L337
- Large satellite separations in core electron photoemission lines from TiF_3
B Wallbank, C E Johnson and I G Main L340
- Thermoluminescence spectrum of heavily-irradiated $\text{LiF}(\text{TLD-100})$
V K Jain, V N Bapat and S P Kathuria L343

PAPERS

- Cohesive energy of silver fluoride
M R Hayns and J L Calais 2625
- Non-ohmic conduction and current oscillations in liquid selenium
F Mahdjuri 2640
- The applicability of the Debye-Waller factor to the He scattering from metal surfaces
George Comsa 2648
- Theory of lattice thermal conductivity
R A H Hamilton 2653
- Quantum transport theory of high-field conduction in semiconductors
J R Barker 2663
- The Wilson theory and the Ginzburg critical region
D J Amit, D J Bergman and Y Imry 2685
- Critical behaviour of an isotropic spin system: I
A J Guttmann and G S Joyce 2691
- High temperature susceptibility series for the spin- $\frac{1}{2}$ anisotropic Heisenberg model
D C Jou and H H Chen 2713
- An exact relation between the classical n -vector model ferromagnet and the self-avoiding walk problem
R G Bowers and A McKerrell 2721
- Magnetic circular dichroism of M and R centres in KCl: I. Experiment
G Binet, J Margerie and M Thuau 2733
- Magnetic circular dichroism of M and R centres in KCl: II. The technique of moments in the R-centre problem
G Binet, J Margerie and Y Merle D'Aubigné 2745

NO 18 18 SEPTEMBER 1973

LETTERS TO THE EDITOR

- The isolated vacancy in diamond and silicon
F P Larkins L345
- The electronic structure of the (111) surface of silicon
V Bortolani, C Calandra and M J Kelly L349
- Theory of one-magnon light scattering in flopped antiferromagnets
Sergio M Rezende L354
- Energy gain of fast electrons interacting with surface plasmons
J Schilling and H Raether L358

PAPERS

- Table of electrostatic potential in cubic ionic crystals
F Y Hajj 2757
- A perturbation-theoretic derivation of Wilson theory
J Hubbard 2765
- Electron gas test for the alternant molecular orbital method
B Laskowski, Jean-Louis Calais, Per-Olov Löwdin and Piet Van Leuven 2777
- Electron-phonon interaction and inter-valley scattering in semiconductors
D C Herbert 2788
- The force on a moving charge in an electron gas
A K Das and Sir Rudolf Peierls 2811
- Dilute Heisenberg ferromagnet within a single-site formulation
Alba Theumann 2822

NO 19 2 OCTOBER 1973

LETTERS TO THE EDITOR

- The electronic structure of a tree
J M Ziman L361

Relation between bulk compressibility and surface energy of liquid metals	<i>R C Brown and N H March</i>	L363
Selfconsistent calculation of the Peierls instability in quasi-one-dimensional conductors	<i>S Barišić and Šaub</i>	L367
The excitation spectrum of a model rare earth alloy	<i>Raymund C Jones</i>	L371
Infrared absorption by acoustoelectric domains in ZnO	<i>K Hess and H Kuzmany</i>	L376

PAPERS

The compressibilities of simple liquid metals	<i>W Jones</i>	2833
A theory of critical phenomena in constrained systems	<i>Yoseph Imry, Ora Entin-Wohlman and David J Bergman</i>	2846
Selection rules for indirect transitions and effect of time reversal symmetry	<i>E Doni and G Pastori Parravicini</i>	2859
Effect of spin-phonon coupling on Schottky specific heat—an exact example	<i>B S Lee</i>	2873
Theory of critical exponents for an itinerant ferromagnet	<i>M R Bhagavan and C Blomberg</i>	2882
Light emission from hot electrons in zinc selenide	<i>K Turvey and J W Allen</i>	2887
Microscopic theory of photoemission in the quadratic response formalism	<i>H Hermeking</i>	2898

NO 20 16 OCTOBER 1973

LETTERS TO THE EDITOR

Localized states in inverted silicon-silicon dioxide interfaces	<i>R A Abram</i>	L379
The valence band of lithium fluoride	<i>J M Adams, S Evans and J M Thomas</i>	L382
One-band density of states for the Polk model for amorphous tetrahedrally bonded semiconductors	<i>R Alben, D Weaire and P Steinhardt</i>	L384

PAPERS

On the spontaneous order of the eight-vertex model	<i>Michael N Barber and Rodney J Baxter</i>	2913
Exact solution of the Maier-Sauper model for a nematic liquid crystal on a one-dimensional lattice	<i>P A Vuillermot and M V Romero</i>	2922
Crystal dynamics of caesium fluoride	<i>V Bührer</i>	2931
Lattice dynamics of silicon and diamond	<i>B P Pandey and B Dayal</i>	2943
On the reduced thermal conductivity of dielectric crystals	<i>S Simons</i>	2947
Calculation of the electronic energy band structure of polyethylene	<i>J E Falk and R J Fleming</i>	2954
Hall and drift mobility of polar p-type semiconductors: I. Theory	<i>D Kranzer</i>	2967
Hall and drift mobility of polar p-type semiconductors: II. Application to ZnTe, CdTe, and ZnSe	<i>D Kranzer</i>	2977
The average nuclear effective charge in tetrahedral semiconductors	<i>L Garbato, P Manca and G Mula</i>	2988
The F centre in magnesium fluoride	<i>A H Harker</i>	2993
Magnetic excitations and magnetic critical scattering in cobalt fluoride	<i>R A Cowley, W J L Buyers, P Martel and R W H Stevenson</i>	2997

NO 21 30 OCTOBER 1973

LETTERS TO THE EDITOR

The detection of crystallographic phase transitions by linear dichroism	<i>A J McCaffery, P D Rowan and R A Shatwell</i>	L387
Isotope dependence for hydrogen diffusion in palladium at low temperatures	<i>Y de Ribaupierre and F D Manchester</i>	L390

Diffraction and rainbow in atom-surface scattering

- G Boato, P Cantini, U Garibaldi, A C Levi, L Mattera, R Spadacini and G E Tommei* L394
 Coherent potential approximation, averaged *T*-matrix approximation and Lloyd's model
A Prasanna Kumar and G Baskaran L399
 On the direct derivation of the resistivity *N Szabo* L402

PAPERS

- Dispersion relations of the normal vibrations in strontium titanate
M Iizumi, K Gesi and J Harada 3021
 Anharmonic thermal x-ray scattering from potassium chloride, aluminium and silver
H Hervet and R Ober 3024
 On the octupole interactions in the inert gas crystals
Ludwik Leibler 3033
 Lattice instability and high superconducting transition temperature
T V Ramakrishnan 3041
 Phonons in disordered systems with strong short-range order
Masaki Goda 3047
 A perturbation-theoretic derivation of Wilson's 'incomplete integration' theory
M J Bisset 3061
 Frequency moments and viscosities of liquid aluminium
Ravinder Bansal 3071
 Density of states from moments. Application to the impurity bands
J P Gaspard and F Cyrot-Lackmann 3077
 A theory of the transport and recombination properties of photoexcited carriers in germanium and silicon at low temperatures
J R Barker and C J Hearn 3097
 Intrinsic photoconduction and photoemission in polyethylene
K J Less and E G Wilson 3110
 Electron correlation in a high density gas confined to very thin films
R K P Zia 3121
 A molecular field theory of amorphous ferromagnets
T Kaneyoshi 3130
 Nearest-neighbour correlations in a spin-1 Heisenberg antiferromagnet
Rajendra Bhandari and L M Falicov 3139
 Neutron scattering investigation of magnetic excitations in CoCl_2
M T Hutchings 3143
 A comment on a recent paper on selection rules for magnon-phonon interactions in antiferromagnetic FeF_2
H Montgomery and A P Cracknell 3156
 Spin-lattice relaxation of calcium cadmium: copper acetate
J R Beswick and D E Dugdale 3159
 ESR study of U_2 centres in BaClF
M Yuste, M Rahmani, D Jumeau, L Taurel and J Badoz 3167
 On nuclear spin-lattice relaxation due to hindered molecular reorientation
P S Allen 3174
 NMR lineshifts and spontaneously broken spin-orbit symmetry: I. General concepts
A J Leggett 3187
 Optical properties and electronic structure of antimony in the energy range 2.5-14.5 eV
J C Lemonnier, J Thomas and Mme S Robin 3205

NO 22 13 NOVEMBER 1973

LETTERS TO THE EDITOR

- A cell model for liquids
O J Heilmann, R Moss and E Praestgaard L403
 On the theory of the Kapitza conductance
G A Toombs and R M Bowley L406
 Compton profile of NaCl
S Manninen, T Paakkari, O Aikala and K Mansikka L410
 An approach to high-temperature series expansions for studying field-dependent phase transitions in ferromagnets
K Durczewski L413
 Three-atom correlations in nuclear quadrupolar relaxation in liquids
J M Titman L417
 Critical opalescence in KDP: a negative result
Kenneth B Lyons, Richard C Mockler and W J O'Sullivan L420
 NMR 'diffraction' in solids?
P Mansfield and P K Grannell L422

PAPERS

- Thermodynamic and physical properties of solids in electric fields
R W Munn 3213
 Localized vibrational modes of Li defect complexes in GaAs
M E Levy and W G Spitzer 3223
 Crystal-field and exchange parameters in MnO and NiO
B F Lau and D J Newman 3245
 Electronic states in a finite linear crystal in an electric field
Motohiko Saitoh 3255
 Screening effects in doped semiconductors
T W Preist and D F Pettengill 3268

Oscillatory magnetoresistance of heavily doped semiconductors at low temperatures	<i>H Van Cong</i>	3275
Magnetophonon effect in GaAs and InP to high pressures	<i>G D Pitt, J Lees, R A Hoult and R A Stradling</i>	3282
Magneto-acoustoelectric phenomena in nondegenerate GaAs	<i>T P Lepetre, J M Dusseau, J L Robert and B Pistoulet</i>	3295
Antiferromagnetism with alternating strong and weak coupling	<i>E J Samuelsen and M Melamud</i>	3305
The dynamics of Heisenberg paramagnets: memory function approach	<i>T Gaskell and J W Tucker</i>	3315
Exchange interactions in $(\text{Cr}_2\text{Cl}_9)^{3-}$ systems	<i>J R Beswick and D E Dugdale</i>	3326

NO 23 27 NOVEMBER 1973

LETTERS TO THE EDITOR

A possible model of amorphous silicon and germanium	<i>G P Betteridge</i>	L427
Surface energy and curvature energy of electron-hole droplets	<i>H Büttner and E Gerlach</i>	L433
On the direct derivation of the resistivity	<i>N Szabo</i>	L437
Electronic properties of $\text{A}^{\text{II}}\text{BV}^{\text{I}}$ semiconductors	<i>L Garbato, P Manca and G Mula</i>	L441
Potts model at the critical temperature	<i>Rodney J Baxter</i>	L445
The longitudinal correlation function in the Heisenberg ferromagnet	<i>J G Ramos</i>	L449
Nuclear magnetic resonance sidebands due to interactions between tunnelling molecular groups	<i>S Clough and Z T Lalowicz</i>	L452

PAPERS

Dynamic structure factor of liquid sodium: a generalized hydrodynamic approach	<i>M I Barker and T Gaskell</i>	3341
The F centre in potassium magnesium fluoride	<i>A H Harker</i>	3349
A theory for the elastic properties of dysprosium antimonide	<i>D K Ray and A P Young</i>	3353
Compressibility and partial structure factors in the zero-wavevector limit of liquid copper-tin alloys	<i>R Turner, E D Crozier and J F Cochran</i>	3359
A search for second to first sound coupling in rotating liquid helium	<i>P Lucas</i>	3372
Screened ions in perfect solids—a model calculation	<i>G J Morgan and N Shahtahmasebi</i>	3385
The reliability of the semi-empirical tight-binding method for band structure calculations	<i>F Casula and D R Edmondson</i>	3403
The theory of the electronic structure of disordered networks	<i>J Dancz and S F Edwards</i>	3413
An APW calculation of the energy band in diamond using different approximations for the exchange energy	<i>José Rezende Pereira Neto and Luiz Guimarães Ferreira</i>	3430
Semiempirical calculation of deep levels: divacancy in Si	<i>T F Lee and T C McGill</i>	3438
Calculations of impurity states in semiconductors: II. GaP:O	<i>M Jaros and S F Ross</i>	3451
Spin-phonon interactions and disorder points	<i>I G Enting</i>	3457
Neutron scattering experiment on the coexistence of superconductivity and ferromagnetism	<i>S Roth, K Ibel and W Just</i>	3465
Effect of rotational diffusion on acoustic paramagnetic resonance in liquids	<i>E M Iolin</i>	3469
A nuclear resonance and infrared investigation of the motional states of methyl groups in solids	<i>P S Allen and A J Snell</i>	3478
Impact ionization of deep impurities in zinc selenide	<i>A W Livingstone and J W Allen</i>	3491
Double ENDOR measurements in $\text{CaF}_2:\text{Tm}^{2+}$	<i>J M Baker and W B J Blake</i>	3501
Theory for the multiplet structure of the far-infrared absorption by off-centred impurities: II. $\langle 111 \rangle$ off-centred impurities	<i>G K Pandey, D K Shukla and A Pandey</i>	3514

NO 24 11 DECEMBER 1973

LETTERS TO THE EDITOR

Simple proof of the Jahn-Teller theorem	<i>I V V Raghavacharyulu</i>	L455
---	------------------------------	------

The exact computation of the lattice Green function for arbitrary polymer helices by integration	<i>C Schmid</i>	L458
Low-temperature expansions for the Ising model with pure triplet interactions on the triangular lattice	<i>M F Sykes, M G Watts and J L Martin</i>	L461
Specific heat of thallium monoselenide between 3 and 600 K	<i>G Brekow, M Meißner, M Scheiba, A Tausend and D Wobig</i>	L462
One-electron properties of the metal-semiconductor junction for zincblende compounds	<i>F Flores, E Louis and F Yndurain</i>	L465
On the Morin phase transition in haematite	<i>O Nagai, N L Bonavito and T Tahaka</i>	L470
Electronic structure of $W_{1-x}Ta_xSe_2$ studied by ^{182}W Mössbauer spectroscopy	<i>M G Clark, J R Gancedo, A G Maddock, A F Williams and A D Yoffe</i>	L474
Magneto-optical studies of KCl:Ti and KI:Ti after x-irradiation at 77 K	<i>J H Beaumont, W Hayes and R T S Laiho</i>	L479
Charge transfer in intercalation	<i>A R Beal and W Y Liang</i>	L482
Far-infrared studies of Mn^{3+} in Al_2O_3	<i>J H M Stoelinga, P Wyder, L J Challis and A M de Goër</i>	L486
High-frequency behaviour of the impurity-induced infrared absorption in liquid argon	<i>V Wagner</i>	L490
Multi-electron satellites in core electron photoemission from $3d^0$ ions in solids	<i>B Wallbank, C E Johnson and I G Main</i>	L493

PAPERS

Inelastic neutron scattering from polycrystalline graphite at temperatures up to 1920°C	<i>D K Ross</i>	3525
Positron annihilation in coloured NaCl	<i>Steen Dannefaer and Lars Smedskjær</i>	3536
A theoretical study of the elastic properties of dysprosium antimonide	<i>Peter M Levy</i>	3545
Spontaneous coherent phonons in the ground state of strong spin-phonon interaction	<i>A Messina and F Persico</i>	3557
On the free energy of crystal surfaces: I. The configurational free energy of low-index surfaces by the Monte Carlo method	<i>R A Hunt and B Gale</i>	3571
Dynamical corrections to the image potential	<i>J Harris and R O Jones</i>	3585
On removing degenerate roots when spin-orbit coupling is included in the pseudopotential secular equation of electron band theory	<i>B R Watts</i>	3605
Remarks on the exchange approximation in covalent semiconductors	<i>F Beleznyay</i>	3608
A perturbative approach to the valence charge density in tetrahedrally bonded semiconductors	<i>C M Bertoni, V Bortolani, C Calandra and F Nizzoli</i>	3612
Band structure and photoemission studies of SnS_2 and $SnSe_2$: I. Experimental	<i>R H Williams, R B Murray, D W Govan, J M Thomas and E L Evans</i>	3631
Band structure and photoemission studies in SnS_2 and $SnSe_2$: II. Theoretical	<i>R B Murray and R H Williams</i>	3643
Effect of pressure on electronic bubbles in liquid neon	<i>G Mazzi, F Toigo and G Torzo</i>	3652
Impurity effects in tungsten phosphate glasses: I. Magnetic resonance properties	<i>G F Lynch and M Sayer</i>	3661
Impurity effects in tungsten phosphate glasses: II. Electrical and optical properties	<i>M Sayer and G F Lynch</i>	3674
Exchange energies for direct excitons	<i>R G Glinski</i>	3689
Theory of photoconductivity in amorphous semiconductors containing slowly-varying trap distributions	<i>J G Simmons and G W Taylor</i>	3706
Theory of highly anisotropic ferromagnets: II. Renormalization of magnon energies in the heavy rare earths	<i>M S S Brooks and T Egami</i>	3719
The Fokker-Planck equation for the Ising system	<i>H C Bolton and C A Leng</i>	3737
The elastic magnetic neutron cross-section for 3d transition compounds: calculations for V_2O_3 , FeF_2 and $FeCO_3$	<i>E Balcar, S W Lovesey and F A Wedgwood</i>	3746
Antiferromagnetic order in cubic crystals	<i>Robert H Swendsen</i>	3763
Magnetic properties of Nd-group V compounds	<i>Per Bak and Per-Anker Lindgard</i>	3774
Electron paramagnetic resonance of trivalent ytterbium, erbium and dysprosium in silver chloride	<i>F B I Cook and M J A Smith</i>	3785
Time reversal invariance and the nuclear quadrupole spin-lattice relaxation tensor	<i>D G Hughes</i>	3797
